

Bridge Investment Group Names Isela Rosales New Managing Director of Capital Markets, ESG and Sustainability

May 7th, 2020 – Bridge is pleased to announce that Isela Rosales has been named as Managing Director of Capital Markets, ESG and Sustainability. In addition to her Capital Markets Group role, she will lead the Firm’s ESG Steering Committee to oversee the development, implementation and refinement of Firm-wide environmental, social and governance initiatives and practices, driving sustainable investments and operations, as well as maintain a focused effort on the Capital Markets Group related to specific accounts and real estate consultants. With Isela in her new role, we are confident we can continue to amplify the work that Matt Jensen began around our efforts to own and operate assets in the most efficient and responsible manner possible, to the benefit of all constituencies.

In her new role, Isela will report to Chief Operating Officer, Adam O’Farrell, and to Vice Chairman and Head of the Capital Markets Group, Dean Allara.

With this appointment, we would also like to announce the resignation of Matt Jensen to pursue other career opportunities. Prior to his role as Managing Director of ESG and Sustainability, Matt served as Chief Operating Officer of Fund Operations. We want to thank Matt for the tremendous contributions that he has made to Bridge over his 14 years with the company.
